

A Vision of I-O: The Siena Consensus

A Think Tank promoted by the NIBIT Foundation

October 7th 2017

(3:00 PM – 06:00 PM)

SIENA

Attendees

I-O Networks

Ramy Ibrahim

(Parker Institute for Cancer Immunotherapy)

Aiman Shalabi

(Cancer Research Institute)

Bernie Fox

(World Immunotherapy Council)

Vincenzo Russo

(Italian Network for Tumor Bio-Immunotherapy)

Pharmas

Jean Viallet and Cosimo Paga *(BMS)*

Giovanni Melillo *(AZ)*

Michel Lahn *(Incyte)*

Dominik Ruettinger *(Roche)*

Patrick Garcia *(Merck Serono)*

Axel Hoos *(GSK, in connection)*

Olivier Provendier *(Pierre Fabre)*

KOLs

Jedd Wolchok

Wolf Fridman

George Coukos

Zlatko Trajanoski

Soldano Ferrone

Michele Maio

Topics for discussion

- 1) Agonistic antibodies in the era of antagonistic antibodies: monotherapy, combination and/or sequence
Introduced by: **Bernie Fox** (WIC/KOL) and **Axel Hoos** (GSK)
- 2) A common denominator among I-O "Omics (mutatome, transcriptome, epigenome, metabolome, proteome, microbiome, etc) to drive the future of immunotherapy: a reachable goal or simply an utopia?
Introduced by: **George Coukos** (KOL) and **Dominik Ruettinger** (Roche)
- 3) Pharmacodynamic biomarkers in the peripheral blood: a worth exploring field?
Introduced by: **Jedd Wolchok** (KOL) and **Jean Viallet** (BMS)
- 4) Bringing to reality novel ideas from young scientists: can "The Siena I-O Consensus Panel" help?
Introduced by: **Ramy Ibrahim** (Parker) and **Wolf Fridman** (KOL)
- 5) Other topics - **All**
