

Attend the 2020 Society for Immunotherapy of Cancer Winter School

A COMPREHENSIVE CANCER IMMUNOTHERAPY
EDUCATION PROGRAM

Jan. 13-17, 2020, in Houston, Texas

The Society for Immunotherapy of Cancer (SITC) Cancer Immunotherapy Winter School is a comprehensive cancer immunotherapy education program, led by experts in the field, to improve your understanding of the core principles of tumor immunology and cancer immunotherapy and examine developing areas in the field.

Scheduled for Jan. 13-17, 2020, at the Hilton Houston Post Oak in Houston, this program is tailored to early-to-mid career scientists and clinicians in the field of cancer immunotherapy working in academic, clinical, industry and government settings as well as those new to the field. The curriculum covers the fundamentals of cancer immunotherapy and features separate tracks, clinical and research, allowing participants to tailor their experience by selecting the educational path most relevant to their learning goals.

During the program, participants will learn:

- Core principles of tumor immunology and cancer immunotherapy
- Recent advancements in drug and biomarker technologies and their clinical application
- Appropriate clinical and/or preclinical trial data analysis methods and best practices in clinical and/or preclinical trial design

Who should attend?

- Early-to-mid career scientists in the field of cancer immunotherapy working in academic, clinical, industry and government settings
- Those new to the field

Program Organizers:

Lisa H. Butterfield, PhD – *Parker Institute for Cancer Immunotherapy/University of California San Francisco*
